**DETAILED ACTION**

***Drawings***

1. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the minor platform panels being under the top platform in claims 4 and 28 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

***Claim Rejections - 35 USC § 102***

2. Claims 1, 2, 4, 6, 8, 17, 18, 23, 26, and 28 are rejected under 35 U.S.C. 102(b) as being anticipated by Taylor, Jr. (3306516). Taylor, Jr. teaches a container with a bottom panel 3, first and second side panels 5, first and second end panels 37, first, second, third and fourth minor interior wall flaps connected to first and second side panels, and first and second platform structures (39, 55, 11).

Regarding claim 2, each hinged platform structure comprises a top platform (55,11), end folding flap 55, and side reinforcement flaps 41.

Regarding claims 4 and 28, the each hinged platform comprises minor platform panels 41 under the top platform.

Regarding claim 6, portion 11 is the roll over panel having rollover tabs 59.

Regarding claim 18, note the first and second minor platform panels 59 and side reinforcement flaps 41 extending from the folding flap 39 to the minor platform panels 59 as shown in Fig. 5.

Regarding claim 23, note the shoulder walls 21.

3. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over Taylor, Jr. in view of Roth (5333777). Taylor meets all claimed limitations except for the handle opening on the end panel. Roth teaches that it is known in the art to provide handle openings 12. It would have been obvious to one of ordinary skill in the art to provide handle openings 12 in Taylor, Jr. as taught by Roth to provide the desired location for the handle.

4. Claims 7, 19, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Taylor, Jr. in view of Bemiss (2130445). Taylor, Jr. meets all claimed limitations except for the corrugated fiberboard having vertical corrugations on the side panels. Bemiss teaches that it is known in the art to provide vertical corrugations on the side panels 12. It would have been obvious to one of ordinary skill in the art to make the container from corrugated fiberboard having vertical corrugations on the side panels in Taylor, Jr. as taught by Bemiss to provide added support at the sidewall portion.

5. Claims 9, and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Taylor, Jr. in view of Brundage (4883221). Taylor, Jr. meets all claimed limitations except for the cornered tabs. Brundage teaches that it is known in the art to provide cornered tabs 100-103. It would have been obvious to one of ordinary skill in the art to provide cornered tabs in Taylor, Jr. as taught by Brundage to allow stacking easily.

*Allowable Subject Matter*

6. Please note that the allowability of claims 3-4, 18-21, and 23 are withdrawn in view of the new reference.
7. Claims 3, 22, and 27 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
8. Claims 10-16, 24, and 25 are allowed.
